CUSTOMER STORY | BRIGHTWELL FOODS

Brightwell Foods cut freight overbilling by 42% and now audits every invoice before it is paid

INDUSTRY	SIZE	TIME TO VALUE
Refrigerated food distribution	900 employees, Midwest US	9-day integration

THE CHALLENGE

Brightwell receives about 14,000 carrier invoices a month. One analyst sampled roughly 5% in spreadsheets, so most overcharges, from duplicate bills to wrong accessorials, were found after payment or not at all. By then many were outside the carriers' 180-day claims window, and the freight line kept growing faster than volume.

THE SOLUTION

- Connected the TMS and carrier EDI feeds in 9 days with no consulting engagement.
- Re-rates every invoice line against the signed contract before payment.
- Flags errors for approvers and files disputes automatically, with evidence attached.
- Gives the CFO a live savings and recovery dashboard.

THE RESULTS

−42%
reduction in annual freight overbilling ($1.9M to $1.1M)

20x
audit coverage, from a 5% sample to 100% of invoices

−75%
reduction in invoice approval time, from 12 days to 3 days

> *We used to find mistakes after the money was gone. Now they are fixed before the invoice reaches my desk.*
